The Industrial Special Indemnity Fund (ISIF) files its Second Quarter Report for Calendar Year 2005 pursuant to Idaho Code §72-324. This report consists of the following chapters: Benefits, Claims Adjudication and Administrative Operations.

BENEFITS

Annuitant Periodic Benefits

Annuitant benefits are paid to individuals who have been awarded or have negotiated a settlement for periodic monthly benefits. Benefits are paid based on a percentage of the applicable state average weekly wage for year of benefit, the year of the injury and the injured worker's average weekly wage. Most annuitant benefits are also subject to the Carey formula, which apportions total and permanent disability benefits between the ISIF and the employer/surety. Annuitant benefits generally are paid for life. The 2005 state statutory rates for annuitant benefits are as follows:

2005 STATE AVERAGE WEEKLY WAGE	
Base of 45% state average weekly wage =	\$244.35
Base of 60% state average weekly wage =	\$325.80
Base of 67% state average weekly wage =	\$363.81

For the second quarter of calendar year 2005, ISIF had 111 annuitants who received \$357,104 in the form of monthly benefits. Annuitant benefits paid in calendar year 2004 was \$1,481,213, plus \$1,551,933 for the purchase of nine structure policies. Structure annuities have been utilized the prior six years as means to fund future annuitant monthly benefits as shown by the graph below.

An arrearage benefit may be owed at the conclusion of a claim and prior to the commencement of current monthly benefits. An arrearage is most likely to occur on judgment loss or consent to entry of judgment claims. Arrearage benefits paid 2005 year to date total \$68,032. In 2004, \$119,169 was paid in arrearage benefits.

MONTHLY & ARREARAGE BENEFIT			
CALENDAR YEAR			
	2005 YTD	2004 YTD	2004 Total
Monthly Annuitant Payments	\$712,317	\$767,825	\$1,481,214
Structure Settlements	-	1,551,933	1,551,933
Arrearage Benefit	68,032	58,668	119,169
Total Benefit	\$780,350	\$2,378,426	\$3,152,316

Settlement Benefits

Lump sum and lump sum/statutory benefits are the two types of settlement options. Lump sum benefits are one time only cash payments issued upon settlement of a claim. Lump sum/statutory benefits are settlements in which a lump sum payment may be made upon settlement, however, some form of future periodic benefit will also be paid.

Future periodic benefits vary in amount and time frame depending upon the terms of settlement. Generally, the periodic payments are based on a percentage of the state's average weekly wage for year of benefit and paid monthly for the life of the claimant. Lump sum/statutory benefit settlements represent substantial lifetime benefits.

LUMP SUM BENEFIT			
CALENDAR YEAR			
	2005 YTD	2004 YTD	2004 Total
No. Claims	15	20	34
Total Lump Sum	\$495,500	\$550,000	\$1,015,000

Fifteen claims were closed with lump sum benefits in calendar year to date 2005. In calendar year 2004, thirty-four claims were closed with a lump sum benefit averaging 29,853 per settlement.

Lump sum/statutory benefit settlements and judgment loss decisions by the Industrial Commission result in additional annuitant claims receiving future periodic payments. Benefits for judgment loss claims are based on a percentage of the state's average weekly wage and are paid for life with annual increases. In 2005 year to date, two claims were closed as lump sum/statutory benefit settlement and one claim was closed as a judgment loss decision. In 2004, seven claims were closed by lump sum/statutory benefit and two by judgment loss decisions.

CLAIMS ADJUDICATION

Claims adjudication is a two-fold process involving both the filing of formal or informal claims by claimants and/or employer/sureties alleging ISIF liability, and the final determination of those claims by result outcomes (non-merit, settlement or judgment loss).

New Claim Filings

New claim filings had stabilized over the past seven years averaging 70 filings per year. Claim filings in 2004 were nearly 20% higher than average, 2003 new claim filings were nearly 60% higher. In general, these new claims represent potentially greater liability as workers compensation claims become more complex legally and medically, with economic downturns creating more difficult return to work issues.

Closed Claims

In calendar year 2004, 82 claims were opened and 68 claims were closed resulting in a net of 95 open litigated claims as of December 31, 2004. Open litigated claims on June 30, 2005 total 93.

Result Outcomes

The result outcome category, the number of claims closed by each result outcome, and the percentage of claims closed in each result category is shown below. In year to date 2005, 95% of closed claims were non-merit and settled claims. In 2004, non-merit and settled claims accounted for 97% of the total closed claims. These percentages follow very closely the same result percentages of previous years.

Litigation Expense

Total litigation costs represent the average defense expense of a claim by result outcome category. While many factors affect overall litigation costs, Idaho Code §72-334, the “60 day” rule, has contributed to substantial litigation savings since its passage in 1997. The “60 day” rule requires a party to file a Notice of Intent with supporting documentation with the ISIF 60 days prior to filing a Complaint.

Litigation costs are expended to fourteen sub-object codes as bills are paid during a claim's adjudicated life. Once the adjudication process is completed, a report is submitted to the Industrial Commission reporting all litigation costs incurred during the life of the claim.

ADMINISTRATIVE OPERATIONS

Revenue

The ISIF was dependent on a levy system for revenue funding prior to July 1, 1997. The levy was a percent of certain paid benefits assessed to insurance companies and self-insured employers on individual claims at the time of claim closure. Over time the levy was inadequate to provide the sustained revenue needs of the ISIF.

Due to the prolonged inability of the levy to generate adequate funding, the workers' compensation industry and the ISIF drafted legislation and changed the funding method. As a result, the Idaho State Legislature passed a new funding formula based on an annual assessment of two times ISIF's fiscal year expenditures less cash available on June 30. The assessment is paid semi-annually by sureties, self-insured employers and the State Insurance Fund based on their pro-rata assessment share.

Without a change in revenue funding, the ISIF would have been unable to satisfy its obligations early in 1998. The current revenue system creates a method of funding that is certain.

Expenditure

The Industrial Special Indemnity Fund's administrative operating expenditures include salaries for three full time employees and general office expense. Operational expenditures for 2005 year to date are \$126,087. Total operational expenditures for calendar year 2004 were \$221,075.

Benefit expense reflects all benefits paid in lump sum, arrearage or monthly annuitant payments.

Total litigation costs, which include all costs associated with claims adjudication such as attorney fees and costs, depositions, vocational rehabilitation and investigation, have declined from highs of \$800,000 in 1995. In addition to the significant cost savings, the average number of litigation days per claim has also decreased. Litigation costs however, have substantially increased since calendar year 2003 due in part to higher claim filings and staffing shortage.
